Introduction

Spring is in the air, and just like flowers in bloom, the playground starts to fill with children again after a long winter season. Cue Playfab's 2021 Spring Catalog, which includes new and exciting playground equipment guaranteed to bring joy to children for many years to come.

For this collection, we focused on connecting our playground solutions with a cohesive design approach. With four inspiring themes, we matched vivid color schemes and design language to every product line, making it easy for you to have a beautiful and coordinated playground.

A great playground also needs to be inclusive and offer a wide variety of play. Playfab strives to make playground equipment that is not only universally designed, but also provides numerous activities to inspire and engage children of all ages and abilities.

We're pretty excited about our new products and hope they provide you inspiration for your own space. Please enjoy this colorful presentation of our new collection!

Inspiration

Portobello

Guilin Hills

Luke the dragon B4Q7

Inspirational play

Play is one of the most important factors in child development. It is through play that young children learn how to engage and interact with the world around them, developing their cognitive and emotional skills, creativity and imagination. Play also supports children in building their dexterity and physical strength, providing their growing bodies with a fun way to stay healthy and active.

That's why a great playground is one that inspires children to play. At Playfab, we aim to push the boundaries and redefine what a playground can be. Our Spring 2021 Catalog will show you the endless ways to create a playground that is fresh and innovative, and of course, fun and safe. If you need a play space unlike any other, here's what we can do for you.

Portobello

The Portobello playground is made up of mushrooms, plants, rocks and grass. It takes you to a fantasy land where you can pretend to be as small as a bug and forget about the real world for a while.

Guilin Hills

Guilin Hills playground is inspired by the mysterious mountains of Guilin. The Combination of EPDM surfacing and our landscaping structures resulted in a new fun way to play.

Dragon

Measuring 24.5 meters long, this spectacular dragon is created with colors and shapes inspired by Asia and Europe. Battle or befriend this majestic beast while climbing and sliding at thrilling heights. The dragon reaches a total height of 5.2 meters.

*Luke the Dragon is based on our Sky Walk system.

Sky Walk

Inspiration was taken by the Virginia Pine tree and spider webs to create these sky tall play structures.

Overcome your fear of heights or just enjoy the rush of the flying feeling you get when playing!

Animal Farm

This beautiful nature park centers around three of our giant bamboo animal sculptures, which offer a combination of climbing, sliding and play houses. This inclusive playground is for everyone, from the age of one year old to teenagers, with wheelchair accessible features available.

Lighthouse

The lighthouse is a daring 6 meter tall structure with rope climbers inside and see through floors for the ultimate experience. A bannister rail and a conventional slide at lower heights and a tube slide for the bravest ones.

Pearl River

Pearl River splash park is a true adventure. The water playground lets you climb a waterfall or a water volcano, run through a sparkling river of pearls or get rain falling on you from the water clouds. The waterways and tides of the spectacular Pearl River delta was the inspiration of the equipment.

Towers of Courage

The adventurous Towers of Courage is not for the faint of heart. Scale your way to the top and glide down the tube slides, or dare to advance to the next tower.

Faceto

Our facet inside climber is a modern steel and bamboo play structure. Together with our climbing rocks this playground stand out wherever it's placed.

Let There Be Light

Light up your imagination! Our spinners combine physical motion and light to fuel children's natural curiosity while improving their sense of balance. Spinners are a great way to enhance the playground with the additional element of light.

B4Q7 is a climbing and sliding playground in shapes of futuristic robots.

Pyramid net structure with a transparent slide going through the structure

Water theming park

Sustainability and adventure playground

The Studio

Concept proposals are developed in three stages: concept sketches, 3D models and renderings. During each stage, we collaborate closely with specialists from an engineering, production, market and user perspective.

The Playfab process

At Playfab, it all starts with the design. We launch our creative process by imagining the product's construction and appearance from the idea stage to the finished product. Our goal is to create innovative and functional products in a simple, modern and elegant style that satisfies both clients and end users.

Before delivering our presentation to the client, we always ensure our products are safe by following safety standards and protocols for the intended region.

Once the initial design stage is complete and the client is satisfied with the layout, our process moves into Phase 2. Playfab engineers take the lead and work closely with our designers to prepare for manufacturing. Teamwork is an essential component as we always try to keep the design as close as possible to what our clients approved.

Playfab designs to manufacture all of our products in-house, allowing us total control of the development process. By overseeing every step from design to manufacturing, we are able to ensure the highest quality of all our products.

To make sure our products are fun and safe, prototypes and play tests of our products are done in-house with children and families in the community, with whom we have a close relationship.

Playfab ships products all around the world, thus a comprehensive design plan is crucial when developing and manufacturing products. Last but certainly not least, our carbon footprint is important to us, so we always make our shipments as small as possible.

Theming

4 different themes, ocean expedition, forest kingdom, space odyssey and castle quest, goes through a wide range of different systems, from toddler and Simplay to Skywalker. You can have a complete playground that really fits well together with both color and shape and importantly, it's suitable for all age groups.

Ocean expedition

Forest kingdom

Space odyssey

Castle quest

Ocean Expedition

Ocean expedition takes you deep under the water surface to explore all the unfolding treasures. The gradient of blue colors enhances the feeling of water depth.

Play panels

Our play panels have a range of different benefits for different ages. It ranges from tactile experiences, social interactions and educational panels.

Simplay

Simplay is available in three different varieties: Value, Wood and Theming. This system focuses on high play value and efficiency – every platform offers at least three activity functions but can have as many as five. The wide variety of units maximizes play opportunity for all ages and abilities by making full and efficient use of the available space.

Simplay is a modular system based on square posts, available in both steel and wood. The platforms are constructed in HPL or wood, with an octagon shape that gives the floor an extra-large surface area, stretching beyond the posts and adding 57% more play. Not only is this unique shape a pleasant design feature, it also makes the structure more suitable for wheelchairs.

Simplay's unique design features include extended roof heights for safety, transparency and visual proportions. The square posts are versatile and can be applied easily to different themes and custom units.

"Standard 1 m² square floor vs. our 1.57 m² floor with 57% more play space"

Simplay Play Functions

Simplay Value

Simplay is a system that focus on high play value. On the value line you have the possibility to have 5 activity functions from every platform. The units allows play for all ages and disabilities.

Wood Play Functions

Toddler

The toddler stage occurs between 1-3 years old, when children advance from infancy toward and into the preschool years. During this stage, their physical growth and motor development appears to slow down, but you can expect to see significant intellectual, social and emotional growth. Our toddler units are specially developed for children ages 1-4.

Learning through play

Play is one of the main ways in which children learn and grow. Our play equipment provides children a sense of adventure, nurturing their infinite imaginations. By fueling their constant curiosity, children learn essential life skills such as problem solving, working with others, sharing and much more.

Our toddler units are available in four different themes with a wide range of play panels to choose from. Some of the play features are also placed at ground level for wheelchair access. Additionally, you can choose a transfer point specially designed for the toddler units.

 Available with transfer point

Our 4 different toddler units uses the same structure and are based on the same outer shape. This makes it easy to pick and choose parts to meet your demands and needs.

Castle Quest

Ocean Expedition

Forest Kingdom

Space Odyssey

Toddler Play Functions

Preschooler

The preschool stage occurs between 3-5 years old. Preschoolers are more independent and very curious about the world around them. During this stage, children are developing the basic life skills and knowledge they will need as they enter their school years.

Our preschool units bridge the gap between the toddler stage and middle childhood, and are developed for children between ages 4-6 years old. The units come in four small single towers with a lot of play functions and play panels. Available in four different themes or with bamboo panels, the preschool units are perfect for small areas or to broaden the age spectrum on a large playground. These units have a floor size of 600mm x 600mm and a full height of 1200mm.

All four preschool units use the same basic structure and outer shape. This makes it easy to select different parts to meet your specific needs, no matter which of our themes you choose.

Robinia

Robinia Wood is playground equipment and is made out of the natural raw material Robinia pseudoacacia and hardwood Bamboo.

Robinia Wood is commonly known in its native territory as black locust, is a medium-sized hardwood deciduous tree, belonging to the tribe Robinieae. The wood is characterized by high durability and high weather resistance. No impregnation is required and the wood can be anchored directly in the ground.

For panels, roofs and floors we use Hardwood bamboo that will stand the test of time. Our bamboo is harder than most other hardwoods, which makes it extremely durable.

bamboo is also slightly more resistant to water damage than the majority of hardwoods.

When compared to wood, bamboo fiber is 2-3 times stronger than timber. Maple wood is one of the densest and strongest hardwoods, yet bamboo is stronger while still being quite a bit lighter.

Natural and sustainable

Robinia Play Functions

Sky Walk

A thrilling and exciting experience like no other, Sky Walk is a landmark play system that lets children play and explore at daring heights, albeit in a safe manner. The system is developed so that different themes may be applied easily. Children will feel as if they are embarking on a grand adventure in the skies, where their imagination is only limited by the sky itself.

Lifting the playground upwards affords many advantages. It reduces the amount of surfacing by building the play area in several layers. This allows for greater play opportunity within a smaller area, taking up less space without compromising on fun

TPF-2601

TPF-2602

TPF-2603

Animal Sculptures

Our charming animal sculptures brings another dimension to your playground. Beautifully crafted long lasting hardwood bamboo mixed with steel will draw a lot of attention.

Natural and sustainable 

Thrilling climbing structures in shapes of a bear and a bull. The climbers can be used for both beginners and advanced climbers. A 3.7 meters tall bird combines rope climbing and sliding. The Elephant and the grasshopper acts as play houses for the younger children and are both wheelchair accessible.

TPF-2609

TPF-2605

TPF-2608

Custom Play

We use our creative imagination and engineering expertise to turn your playgrounds into breathtaking landmarks.

Playgrounds are gathering places for friends and family and that is where long lasting friendships and bond's often are made. Playgrounds are places where imagination and creativity thrive, so when we design custom playground solutions we always try to amplify children's possibilities for a more creative life and a place where they can develop their social skills even further. We try to help the children having the urge to come back, again and again, to continue their journey to become teenagers.

We want our playgrounds to tell the children a story, we want the children to interact and develop with that story. Visual storytelling will help define the core message of the story we want to tell and should always be a big part of children's development, because it is as important as reading.

Freestanding

Playfab's Freestanding is a wide range of different play functions and materials. This collection is developed to easily complement and fit with all of our different systems.

Freestanding means the equipment does not belong to any particular system, but its shape and color allow it to be easily integrated into any chosen system. These products are a great way to fill in empty spaces and accessorize a playground, bringing it all together with a few finishing touches.

Landscape

Our Landscape structures combine EPDM and play functions in a new and exciting way. The EPDM blends seamlessly into the ground through artificial hills carved with tunnels and slides for fun and engaging play.

Incorporating our Landscape structures with the playground's natural environment has been a major goal for us at Playfab. Blending the play structure in with the surrounding terrain instantly opens up the playground from a visual and spatial standpoint. The natural world itself becomes the playground, allowing children to play in a beautiful, free and open space.

The Landscape structure can serve as the primary play opportunity itself, or can act as a bridge between the natural ground and other play structures. Focusing on inclusivity, these structures can serve as the backbone of your playground, providing a more fun and challenging experience for all children.

Climb up or slide down mountains, hide out in caves or crawl through tunnels – the possibilities are endless and the size of the structure is only limited by the size of your playground.

Splash Park

A splash park is a water playground that often can be non supervised because of the lack of water depth. A playfab splash park is a mix of our standard play elements and water play to make the ultimate experience.

Activity Play

Activity play are obstacle courses that challenge and improve strength, endurance, coordination and balance. The activity play allows visitors to train or compete in a fun and safe environment.

Playfabs activity play is a series of challenging physical obstacles an individual or team must navigate, usually while being timed. Obstacle courses can include running, climbing, jumping, crawling, and balancing elements with the aim of testing strength, speed, endurance and agility.

It is developed to fit together with Simplay in shape and in standard color.

Net-x

Net-X are thrilling climbing structures. Use one of our predefined Net-X combination or choose your own layout. Our four different themes are also available.

Sprung out from our Simplay line, Net-x uses the same components and can be used as freestanding structures or connected to Simplay. A wide range of different solutions make Net-x perfect for both play and physical activity.

ABA Play

A.B.A Science play heralds a revolution in play equipment for children of all ages, bringing interactive play and learning to the playground as never before.

Inspired by STEM education, the children get to feel, experience and understand science laws of the world we live in and our environment. Our playgrounds encourage the parent-child bond through mutual learning and play.

A.B.A introduces state of the art technology equipment, incorporating audio and visual elements, electronic and mechanical components, water, light, recycling, renewable energy and more.

Music Play

Music instruments on playground is an important contribution, children develop greater creative thinking abilities. Our instruments also improves children's working memory and fine motor skills. The playground is a great start for children to continue a long journey with music instruments. Children who learn music in a formal setting show greater math, reading, and language skills.

Inclusive play

Inclusive play

An inclusive playground means including people with all abilities in everyday recreational activities, and providing them the same opportunities to participate in every aspect of life to the best of their abilities and desires. That is true inclusion. At Playfab, we strive to make universally designed playground equipment and provide a sensory-rich environment that nurtures children's physical, social and emotional growth. A Playfab playground is an engaging space that provides every child the perfect level of challenge and an opportunity to succeed.

Play equipment marked with our inclusive symbol is developed to meet Playfab's inclusive guidelines. It can be accessed and used to varying degrees by all children, including children with a range of different abilities.

Play equipment marked with our wheelchair symbol is developed to meet Playfab's wheelchair accessible guidelines. It can be accessed and used by all children but is specially developed for wheelchairs.

Play equipment marked with our transfer point symbol is developed to meet Playfab's transfer point guidelines. The equipment provides access to elevated play structures without the use of a wheelchair.

Sustainability

Playfab wants to develop, deliver and play green.

Sustainability means meeting our own needs without compromising the ability of future generations to achieve their own.

With every product Playfab makes, we choose materials that are not only safe for children, but for the environment as well. Steel is an invaluable resource, as it is both durable and 100% recyclable. In addition to steel, we incorporate recycled plastics in our products in an effort to reduce further landfill waste. By using sustainable materials such as steel and recycled plastic to build our products, we are conserving what is left on this planet for our children.

We create these wonderful spaces for children to thrive now. Let's protect the wonders this planet has to offer so our children can thrive in the future.

Tree of Color

Playfab's collection of colors are developed with great care to engage, inspire and enhance the feeling in our products.

Choice of Color

Playfab products are produced from many different materials, the material and method for manufacturing played an important role in the choice of colors. Exposure to extreme weather conditions and sunlight sets high demands on colors and their sustainability.

The life cycle of Playfab products is long, the choice of color has to be well thought through to be able to stand in time and have a good balance between number of colors.

It is not only the colors that determine how a color combination is perceived, the contrast between light and darker colors also comes into play, as well as the proportions between the different colors. A deviating color is perceived as an accent, much of the same color as a color explosion. A color that is much lighter or darker than the others can be perceived as either an accent color or strongly contrasting depending on how large an area it covers.

** Playfab's Standard HPL colors*

Playground Material

Construction

Our construction process uses solid steel Q235, cleaned with sandblasting. Zinc spray and powder coating help to prevent corrosion. 1-steel, 2-sandblasting, 3-zinc spray, 4-powder paint.

Pipe

Carbon steel Q235 has a thickness of 2.5-3mm and is fully covered with zinc metallic coating. Good anti-rust performance.

Pine Wood

Imported African Pine wood 100mm x 100mm, coreless, UV and water resistant. Wood posts are processed in three-phased impregnation process. High mechanical processing properties for outdoor use.

Hardware

Hardware is made of 304 stainless steel, anti-theft screws, individually packaged and labeled per component. Designed for fast installation process and lower vandalism with S-Torx module.

HDPE

High Density Polyethylene board is resistant to abrasion by chemicals and corrosion. It resists weathering, discoloration and UV rays. Easy to clean and recycle, neither graffiti nor paint adhere to it. Toxin-free. Thickness ranges from 5mm to 20mm.

HPL

High pressure laminated board has high hardness and highly resists weathering, scratches, discoloration and UV rays. Toxin-free. Thickness ranges from 5mm to 20mm.

Wood-plastic Composites

Co-extrusion PVC outer layer and recycled plastic wood composite filler. High durability against scratches, UV resistant against graining and drying. High quality for outdoor decking.

Bamboo Board

Natural looking, recyclable, thick and dense with over 1160kg/m³. Durable and highly sustainable for outdoor use. Thickness ranges from 10mm to 40mm.

LLDPE

Linear low-density polyethylene plastic is resistant to UV rays. High-strength, smooth surface and good capability for safety and environmental protection.

Stainless Slide

The slide is made of stainless steel 304. The metal sheet has a thickness of 2-3mm.

Climbing Grip

Climbing grips are made from chippings and colorful polyester resin.

Pipe Cap

Pipe cover for round 114mm pipe, made from dual molded inner steel fixture and external injection molded polyamide cap or CNC routed HDPE/HPL cover.

Nylon Rope

Made of tightly woven, polyester-wrapped, 6-strand galvanized steel. These abrasion, fade and vandal resistant cables are extremely durable. Commonly used colors are black, red, green and blue.

Rope Clamp

Rope pressed in a sleeve made of durable aluminum alloy.

UV Print

Interesting elements are printed on the aluminum plate with a thickness of 2-3mm. UV printing is used outdoors to prevent fading caused by UV rays.

Wire Mesh

Made of stainless steel. The wire mesh adopts a mesh product with an assembled overall frame structure.

Spring

Made of steel with a spring diameter of 200mm and rod diameter of 20mm. The springs are zinc sprayed and powder coated to prevent corrosion.

Chain

Extremely durable 6mm stainless steel chains.

Warranty

The Urbanix warranty is more than just a word, it's a personal commitment that you will be satisfied with your purchase. In our many years of selling outdoor fitness equipment, rigorous testing and field use of our products has resulted in top quality machines with proven high performance. We are confident that you will get your money's worth. Guaranteed customer satisfaction, thicker steel, better paint, galvanization and superior design are just some of our advantages.

All products come with a warranty

The warranty assumes that all products are shipped free from manufacturing defects in materials, structure, workmanship or finish. The warranty does not include damage resulting from abuse, negligence, misuse, extreme weather conditions, accidents, shipping damage, fire, flood or any other condition that would not be considered normal use or normal facility application. Any warranty disputes will be at the sole discretion of the manufacturer who reserves the option to replace, repair, or refund if the product is found defective upon inspection. A clear photograph of the defect also may be necessary to support the claim.

15
Year

top standards - top quality

15 Years

Limited Warranty

For Urbanix products stainless hardware and aluminium components against structural corrosion.

5
Year

top standards - top quality

5 Years

Limited Warranty

For Urbanix product line structural integrity, main posts, steel tubes and welding procedure against structural failure due to manufacturing defects.

2
Year

top standards - top quality

2 Years

Limited Warranty

For all Urbanix fitness equipment parts including bearings, hydraulic system, seats and handles against structural failure due to manufacturing defects.

This warranty does not include any cosmetic issues or wear and tear from normal use, misuse or vandalism. It is valid only if the equipment are erected to conform to installation instructions and maintained according to the maintenance procedures.

Standards

Our design and engineering team work hard to create innovative outdoor playgrounds that are safe for everyone to enjoy. Urbanix and Playfab products are compliant / certified with the applicable safety standards.

**European Outdoor Fitness Standard
(EN 16630)**

**European Outdoor Playgrounds Standard
(EN 1176)**

**Colours and Materials Standard
(SGS and EN71)**

Profile

UBX is a new generation in outdoor gyms and playgrounds. We believe outdoor parks should be suitable for all ages, in addition to being scalable, comfortable, inclusive, inviting, engaging, and most of all – safe. We wish to help everyone enjoy the benefits of an active lifestyle in a fun outdoor environment, free of cost.

Start Small, Grow Up

For over a decade, UBX has excelled in the global market of outdoor fitness equipment. Through our dedication and delivery of high standards, we developed buyer trust and expanded to other markets. Since then, UBX has become a recognizable brand name in the fitness industry.

UBX established its own factory in China to make more innovative products and maintain its high quality. In 2017, UBX created Playfab as a brand for exceptional playgrounds and play items.

By People, For People

The UBX production team consists of top-caliber engineers and designers, and experienced welders. We are dedicated to making the best products in the world of outdoor gyms and playgrounds. Together with certified health experts, we continuously find ways to enhance and improve the UBX lifestyle that we bring to your community.

Fit Everywhere, Full Solutions

Our products are suitable for most outdoor venues – public parks, schools, retirement communities, organizations – even in harsh weather or at the beach. Our products are colorful and inviting with a low urban footprint that complements the surrounding environment, creating an enjoyable and active space that brings communities together.

We have a wide range of products available for outdoor fitness and playgrounds, for all different ages and functions. And because we believe in the power of being dynamic, we're constantly innovating and designing new ideas for the future.

UBX is dedicated to serving a growing global market, with fabrication based in China and forward offices located in Israel, Serbia and Romania.

We provide OEM and ODM solutions to all our global partners, allowing you to focus on sales.
